cadett ELSA 11.0 View

A "see but not touch"-product. Navigate among projects, drawing sheets and articles. View and print. No editing can be made. No AutoCAD is needed.

cadett ELSA 11.0 Start

The solution to start with. Yet a complete tool for electrical design. Complete drawing environment with more than 5000 symbols. Uses AutoCAD/AutoCAD Electrical.

cadett ELSA 11.0 Basic

The solution for you who do not have the most advanced requirements. Network support with common storage of symbol, project and article information. Flexible report generator. Dynamic OnLine enables direct editing of the device list. The changes update the circuit diagrams directly OnLine! Uses AutoCAD/AutoCAD Electrical.

cadett ELSA 11.0 Professional

The most advanced solution on the market. Complete wire handling with both internal and external connections, automatic wire optimization, wire numbering and more. Uses AutoCAD/AutoCAD Electrical.

cadett ELSA Automation Module

The concept of automation solutions is that cadett ELSA is remotely controlled to automatically generate documentation that otherwise would have to be made manually. This can be driven very far, so far that a complete documentation can be both created and maintained automatically,

with no manual involvement. cadett ELSA 9.0 Professional is required.
